

# Kshitija Kumbharkar

## Product Manager & Product Design Engineer

Los Angeles, CA • kumbharkarkshitija14@gmail.com • kumbhark@usc.edu • (213) 245-5814 • linkedin.com/in/kshitija-kumbharkar

### EDUCATION

University of Southern California — USC Viterbi, M.S. Engineering Management May 2026 · GPA 3.85  
Vishwakarma Institute of Technology, Pune, B.Tech Mechanical Engineering Jul 2022 · GPA 8.98/10

### EXPERIENCE

- Product Intern — Product Strategy & Platform Roadmap**, *Porsche Engineering Services (PEUS)* Jun 2025 – May 2026
- Led 0 → 1 development of Houston, an internal ADAS simulation platform; scaled adoption from 10 to 50+ vehicles over a 12-month build.
  - Built Houston\_CC geospatial module tracking 50,000+ km of fleet coverage; cut processing time from 4–5 hours to ~10 minutes and managed A2D2 KPIs.
- Product Design Engineer — Systems Integration & PLM**, *Mercedes-Benz R&D India* Sep 2022 – Jul 2024
- Led EV wiring-harness design across the product lifecycle in UG-NX, PREEVISION, and EPDM; improved design-data accuracy by 20%.
  - Supported PPAP risk assessments and ISO workflows, driving 30% lower operating costs, 15% higher efficiency, and ~2% S-Class savings.
- Design Intern — Operations & Stakeholder Management**, *Dassault Systèmes* Jan 2021 – May 2021
- Coordinated cross-functional teams on the 3DEXPERIENCE platform; improved project delivery time 20% and client satisfaction 15%.
- Supply Chain Intern — Process Automation & Workflow Design**, *Cummins* Jun 2019 – Sep 2019
- Designed automated NHNT engine assembly-line solutions with two-hand safety and min-max inventory controls, improving efficiency 25% and cutting holding costs 10%.

### PROJECTS

- The Daily Brief** — Deployed a 0 → 1 multi-model GenAI news summarizer (4 LLMs, Flask, Hugging Face) with a ROUGE/BERTScore + human evaluation framework.
- FSAE Suspension & Steering** — Designed a full double-wishbone suspension and rack-and-pinion steering system in CATIA / 3DEXPERIENCE (Dassault).
- Kaplan Turbine Design & CFD** — Designed a ~1 MW low-head hydro turbine with SolidWorks CAD, CFD flow simulation, and static-structural analysis.

### TECHNICAL SKILLS

**Engineering:** SolidWorks, UG-NX, PREEVISION, EPDM, CATIA V5, CREO, ANSYS, Motor-CAD, PLM, tolerance stack-up, wiring harness design  
**Software & Data:** Python, JavaScript, Node.js, SQL, Flask, GenAI/LLMs, geospatial systems, data analytics  
**Product & Program:** Product development, requirements, roadmap planning, milestones, risk analysis, KPI development, stakeholder management, Jira, Confluence, Figma

### LEADERSHIP

Viterbi Graduate Students Association — Senator, ISE Department (Aug 2025 – May 2026): represented 150+ ISE students and organized industry events with leaders from Qualcomm, Western Digital, and FIS.
